

# Weed of the Week

*Help the City of St. Albert control  
invasive plants/weeds in our community!*

*An invasive plant is a non-native plant  
that spreads easily, aggressively and may  
displace or alter natural plant communities.*

*As per the Alberta Weed Control Act,  
municipalities are required to control the spread  
of noxious weeds.*

## **OXEYE DAISY:**

***Locations:***

Found in a wide range of habitats.

***Identification:***

Stems are smooth and grow up to 1.5 metres tall. Flowers are white with a yellow centre.

***City Control:***

Manual removal is effective as long as the roots are removed too. The City plans to control small patches through repeated manual removal.

***What can you do?***

Repeated hand pulling is effective. Be sure to dig up the roots.
